DETAILED ACTION

Response to Amendment

The examiner acknowledges the amending of claims 2-12, and 15-16, as well as the cancellation of claims 1, and 13-14.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Prior art such as US 5369661 and US 5513201 were found to teach the polarization element as added by the applicant's amendment, but failed to teach proper placement of the device in the overall system.

Allowable Subject Matter

Claims 2-12 and 15-17 are allowed.

The following is an examiner's statement of reasons for allowance:

Claim 2 is allowable as a semiconductor laser device comprising a light emitting unit which has an array of emitters having beams entering the resonator independently to pump a solid state gain medium, upon which a reflection mirror is formed, and an output mirror is joined via a gap, having at least two of such units, and combining the outputs of the individual units (having different output polarization directions) into a polarization element which passes one beam set and reflects the other such that the outputs are superimposed, was not found to be taught in the prior art or be an obvious

combination of the prior art. Prior art such as US 5369661 and US 5513201, were found to teach the polarization element, but in each of these systems the element is in place prior to the beams entering the resonator, not at the output of the outcoupling mirror, not meeting the claim limitations, and additionally, would not keep the beams independent before they enter the resonator.

Claim 3 is allowable for the same reasons as claim 2, and contains additional limitations such as fiber bundles.

Claims 4-12, and 15-17 are allowable as they depend directly from claims 2 and 3.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
